Summary:

AI Engineer and **Data Scientist** with experience delivering end-to-end AI solutions including ATS automation systems and generative AI agents — achieving up to 60% reduction in manual effort. Skilled in ML, deep learning, and vector search technologies to develop data-driven systems that improve

Education:

Bachelor of Electronics and Communication Engineering, Faculty of Engineering, SVU University.

Grade: Very Good.

(2021 – 2026)

Experience:

- **AI & Data Science (Internship) | DEPI (remote).** **Jun 2025 – Dec 2025**

Data analysis & visualization with Python, Web scraping, SQL, Machine learning, MLOps, MLflow and Hugging Face.

- **Automation Engineer (Internship) | ITIDA / Hosted by Phoenix (on-site).** **Aug 2025 – Oct 2025**

Developed automation workflows with n8n reducing manual content publishing time by 40% and increasing posting consistency to 30+ posts/month.

- **GEN AI Summer Training | NVIDIA / ITI Egypt (remote).**

Aug 2025 – Sep 2025

Building LLM apps with prompt engineering, RAG and Langchain.

- **Artificial Intelligence Training | NTI / HUAWEI (on-site).**

Dec 2024 – Feb 2025

Python, OOP, Math/Stats for AI, ML & DL basics.

- **Machine Learning Training | NTI (online).**

Jun 2025 – Aug 2025

ML algorithms from scratch and Predictive models with Scikit-learn Feature engineering, outliers and PC.

- **Agentic AI Engineering course | Karim Nabil (Live).**

Aug 2025 – Oct 2025

Built Python-based AI agents with advanced tool calling, external API integration, and RAG pipelines using vector databases for real-time knowledge retrieval.

- **CCNA v7 Training | NTI (on-site)**

Jul 2024 – Aug 2024

TCP/IP, subnetting, routing/switching, VLANs, ACLs, Cisco Packet Tracer.

Projects:

Kaggle 2021 Data Science Survey — Arab Community Insights.

Analyzed **23K+ survey responses** to extract insights about the Arab DS community, improving dashboard usability for non-technical users.

AI Automation with n8n.

Automated lead follow-ups and data syncing operations, saving 10+ hours of manual work per week and minimizing human errors.

HR CVs screening With RAG Technology.

Built an AI-powered CV screening system that reduced manual review time by 60% and ranked 200+ candidate profiles with semantic search.

Certificates:

AI and Data Science – DEPI.

Machine Learning – NTI.

AI Automation – ITIDA.

Artificial Intelligence - Huawei / NTI.

Generative AI - NVIDIA / ITI Egypt.

CCNA v7 - NTI.

Skills & languages:

Languages:

- Arabic (Native language). - English B2.

Skills:

- **AI and Machine Learning:** TensorFlow | Sikit-Learn | XGBoost | RAG | Vector Databases (FAISS) | LangChain | CrewAI | NLP.
- **Data Analysis:** Python (Pandas, NumPy, Matplotlib, sikit-learn), Data visualization, Statistical analysis and Web Scraping.
- **Software Development:** C/C++ | Python | SQL (MySQL).
- **Web Development:** Django | HTML | CSS.
- **Soft Skills:** Teamwork | Presentation Skills | Time Management | Adaptability | Communication | Active listening | Strategic planning | Cultural awareness.
